

Content Move for iManage

*The fastest way to move content from one Workspace to another
and from one library to another*

Moving content from one Workspace to another can be tedious and time-consuming. GDSI solves this challenge by automating the task. Instead of moving documents and folders one by one, you can move items between Workspaces of a single library or multiple libraries in bulk.

KEY FEATURES

- Move content between Workspaces of the same library
- Move content to a separate library
- Map folders from source to destination
- Option to delete Workspaces and Folders after content is moved
- Review number of documents to be migrated and which documents are checked out at time of migration

SYSTEM REQUIREMENTS

- iManage Work 10.4 or newer
Web, iManage.Work, CloudiManage
- Microsoft IIS Server
Windows 2016-2022
- Microsoft SQL Server
2016-2022
