

# DMDrop for iManage

*Rename and save emails in bulk directly from your inbox*

Filing emails is often pushed to the bottom of the to do list, but it's critical to have this information stored in a centralized, secure space within iManage. Professional service users need an easy way to file and classify emails to stay compliant and avoid costly lawsuits. GDSI provides a simple and effective way to save emails and rename them either one by one or in bulk.

## KEY FEATURES

- Supports an unlimited number of emails
- Drag & drop, right click, or select the action from your ribbon bar
- Choose to save to one location or to multiple folders
- Send attachments separately from emails
- No installation required

## SYSTEM REQUIREMENTS

- A local, on-premises Windows 10, 11, 2019, 2022 installation using Work 10.6 (or newer) Applications
