

DMSync for iManage

The easiest way to sync and access your iManage profile metadata

Accessing document profile information for Workspace and folder content doesn't need to be a long and expensive process. Professional services need a way to report on the content stored in iManage Cloud without development. GDSI automatically synchronizes your data on a regular basis to keep it current and easily accessible.

KEY FEATURES

- Automatically syncs all workspace, folder, and document metadata, including custom fields from iManage cloud to your SQL server
- Supports an unlimited number of cloud-based databases
- Tracks document creation and all edits
- Allows for custom setting and actions
- Schedule syncs based on your schedule

SYSTEM REQUIREMENTS

- A local, on-premises Windows 10, 11, 2019, 2022 installation
- A local SQL server 2016-2022
