

Exporters for iManage

The easiest way to export folders, documents, and Workspace content

GDSI has solved the challenge of bulk exporting in Work 10 with our Workspace, Folder, and Document Exporter tools. Users of Work 10 require exports for upcoming client meetings, court dates, meetings, or simply a departing user. GDSI has made the process of bulk exporting of content quick, easy, and affordable.

KEY FEATURES

- Exports a CSV file with all metadata
- Exports documents to a Windows network share
- Ability to convert all files to PDFs and merge together
- Content filters can be used for dates, app types, and authors
- Support for mass exports of Workspaces, for administrators only

SYSTEM REQUIREMENTS

- iManage Work 10.4 or newer
Web, iManage.Work, CloudiManage
- Microsoft IIS Server
Windows 2016-2022
- Microsoft SQL Server
2016-2022
