

WSToolkit for iManage

The easiest, most versatile Workspace Generator Tool

Creating workspaces and managing matters in iManage is an inefficient and complicated process without the right tools in place. Professional services need a powerful, yet simple solution that doesn't require expensive consultants and high installation costs. GDSI has made workspace generation and matter management as easy as possible to set up and maintain.

KEY FEATURES

- Create an unlimited number of cloud-based workspaces
- Sync data directly from your accounting system or client/matter source
- Import custom lookup fields
- Identify changed client and matter names
- Utilize native iManage templates

SYSTEM REQUIREMENTS

- A local, on-premises Windows 10, 11, 2019, 2022 installation
- A local SQL server 2016-2022
