

Content Deleter Suite for iManage

The easiest way to delete content

If you have data that is no longer required, whether it's expired, a closed matter, a testing folder, or an internal governance document, we got you covered. GDSI provides a simple and easy way to delete these items with minimal effort, using three separate modules—Workspaces, Folders, and Documents.

KEY FEATURES

- Remove all Folders and Documents from a given Workspace
- Remove all Subfolders and Documents from a given Parent Folder
- Remove Documents in bulk
- Remove Workspaces in bulk that meet a Closed Matter
- Schedule routine deletions based on business logic

SYSTEM REQUIREMENTS

- iManage Work 10.4 or newer
Web, iManage.Work, CloudiManage
- Microsoft SQL Server 2019-2022
